

What do we use as protocols for clinical examinations of patients?

Philippe Gadet D.O.

Presentation

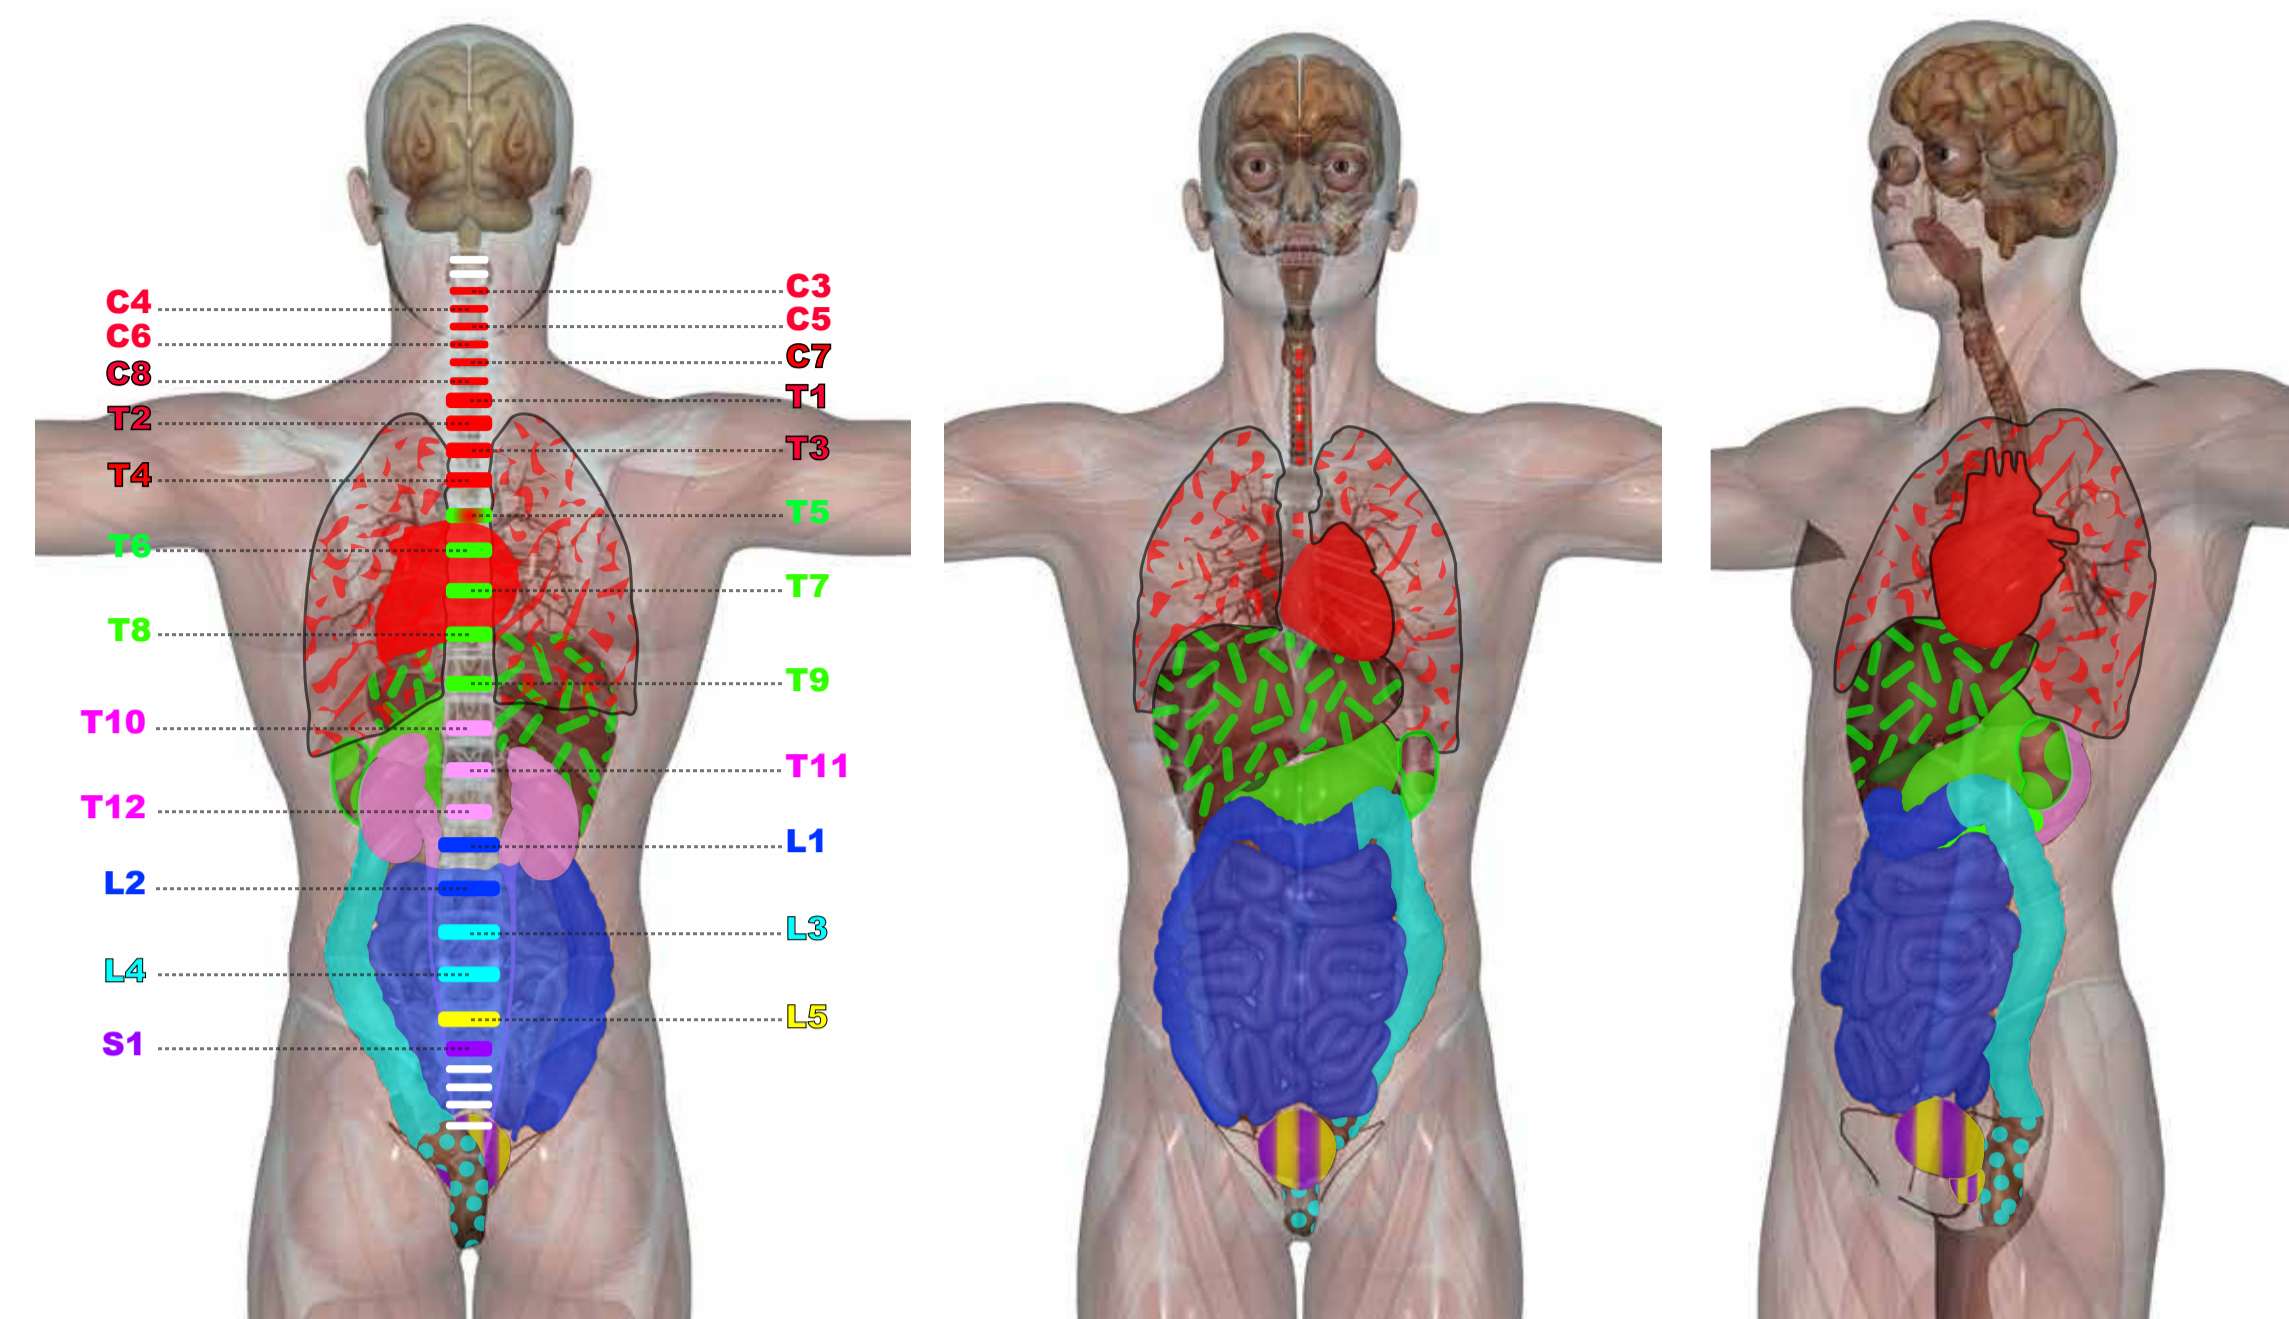

As a student-pilot learns check-list and basics aeronautics principles to be able to fly the plane, a student in osteopathy should acquired clinical examination check-lists and gesture to be able to get a step back in front of a difficult patient support. I propose items for history taking in mnemotechnics forms, tools for studying pain. I propose drawings with visual links between dermatomes, myotomes, viscerotomes, sclerotomes, « Head Zones » made through a large literature review. All this work is being published in « Maîtrise de l'examen clinique ostéopathique », first semester of 2018 at Elsevier Publishing. This book has about 300 bibliographic references and is based on studies and researches.

Correspondance des dermatomes du thorax, des membres inférieurs et supérieurs et du crâne avec le niveau médullaire des organes viscéaux

Correspondance des organes

C3-C6		Coeur
C7-T5		Poumons
		Foie
T5-T9		Estomac
		Rate
		Pancréas
T10-L1		Reins, Surrénales, Uretères
L1-L2		Colon ascendant 1/3 Colon transverse Intestin
L3-L4		2/3 Colon transverse Colon descendant Sigmoïde Rectum
L5-S1		Vessie Prostate
